Consolidated Results for the First Half (Interim) of FY2026/3

Orders reached a record high in the first half for the fifth consecutive year

While the outlook for the Japanese economy as a whole still requires careful consideration, the market environment for the fire protection industry remains strong.

First-half orders posted a record high for the fifth consecutive year.

Net sales also reached a record high for the second consecutive year

With the order backlog remaining at a record high, net sales also exceeded the plan, setting a new record for the second consecutive year in the first half.

First-half profits declined, but the full-year record profit forecast remains unchanged

Our earnings tend to be weighted more in the second half of the fiscal year (particularly in the fourth quarter), when many properties are completed.

In terms of profit levels up to the second quarter, the impact of unprofitable large-scale properties and an increase in SG&A expenses were noticeable, but the profit margin is expected to improve toward the end of the fiscal year.
